Unlock the Full Potential of Your Business

Microsoft 365: The Ultimate Collaborative Platform

The ultimate collaborative platform designed to transform how your business operates. Imagine a workspace where your team can leverage AI, collaborate seamlessly, manage documents effortlessly, and automate business processes with ease—all while maintaining top-notch security and compliance.

Microsoft 365 is not just a tool; it's a strategic asset that can drive efficiency, enhance productivity, and foster innovation within your organisation.

Boost Team Collaboration: Enhance communication and teamwork with real-time document co-authoring and dedicated team sites.

Seamless Document Management: Centralise storage, implement version control, and eliminate duplication.

Automate Business Processes: Streamline workflows and automate routine tasks to improve efficiency.

Ensure Robust Security and Compliance: Manage permissions effectively and stay compliant with industry standards.

Bring your data to life with AI: Copilot agents integrated into the solution makes your data more accessible than ever before

Common Challenges With DIY 365 Deployments

Are You Facing These Issues With Your Current Setup?

Access and Security Challenges: Difficulty managing permissions and ensuring secure access.

Syncing Problems: Frustrating sync issues causing confusion and downtime.

Ineffective Workflows and Automation: Missed opportunities for efficiency due to poorly set up workflows.

Duplication and Collaboration Issues: Struggling with duplicate files and ineffective collaboration.

Modern Work as a Service

Our Expertise, Your Success

Our Modern Work as a Service offering provides your business with a cost-effective, efficient, and flexible approach to implementing 365 solutions tailored to your specific needs.

With instant access to a diverse range of prebuilt solutions, rapid deployment timelines, and ongoing support and improvement, your business can maximise the value of your investment while focusing on driving business success.

Cost Savings:

By eliminating the high costs associated with engagement, development, deployment, ongoing support, and training, your business can achieve significant cost savings while still benefiting from robust 365 solutions.

Efficiency Gain:

Our solutions are designed to streamline various business processes, improving efficiency, productivity, and collaboration across teams and departments.

Faster Time-to-Value:

With rapid deployment and instant access to prebuilt solutions, your business can start realising return on investment almost immediately, without the long wait times associated with traditional deployment approaches.

Scalability and Flexibility:

The subscription model and customisable nature of our solutions allow your business to scale your solution portfolio based on changing needs, ensuring optimal resource allocation and flexibility.

Real-World Application:

Our solutions are built to address real-world challenges faced by businesses across industries, providing practical, tangible benefits that directly impact business outcomes.

Modern Work as a Service

Prebuilt Catalogue of Solutions:

Our platform offers a prebuilt catalogue of SharePoint solutions, covering areas such as Document Centre, Job/Project Centre, Risk Management, HR, Process Centre, Policy and Procedures, and much more. These solutions are ready to deploy, eliminating the need for extensive development and customisation from scratch.

Monthly Subscription Model:

Access to our library of solutions is provided through a monthly subscription, allowing your business to benefit from a wide range of functionalities without the high upfront costs associated with traditional engagement models. This subscription model enables flexibility and scalability, allowing your business to adapt your solution portfolio based on evolving needs.

Customisation and Tailoring:

While our solutions come prebuilt, they are highly customisable and can be tailored to align with your specific requirements, branding guidelines, and workflows. You have the flexibility to adjust features, layouts, and functionalities to suit your unique preferences and processes.

Rapid Deployment:

Our solutions can be deployed within your environment in a matter of weeks, significantly reducing the time-to-value compared to traditional deployment timelines that stretch over months. This rapid deployment ensures that your business can start realising the benefits of your investment almost immediately.

Ongoing Support and Improvement:

Gain access to our team of Modern Work specialists who provide ongoing support, maintenance, and continuous improvement. This ensures that the solutions remain optimised, up-to-date with the latest features and security patches, and aligned with your evolving business needs.

Our Library

Here are just a few examples from our growing collection of solutions. With your subscription, you'll gain immediate access to both new and existing templates, ensuring a swift return on your investment.

Document Centre:

Centralises document management for businesses with features like document libraries, version control, collaboration, and search capabilities, streamlining the handling of critical business information.

Job Centre:

Manages job-related procedures by overseeing multiple clients and projects within a central environment, using Power Platform-supported registers to create specific project folder structures.

Process Centre:

Generates diverse SharePoint pages using pre-designed templates, providing easy access through an indexed system with filters. It includes built-in review periods to ensure information is up-to-date.

Employee Onboarding:

Simplifies the onboarding process with digital forms, task checklists, orientation materials, and HR system integration, ensuring a smooth transition for new hires and reducing administrative overhead.

Corporate Communication:

Provides tools for internal communication, including news publishing, event management, discussion forums, and employee directories, improving communication, collaboration, and engagement.

Journey Management Plan:

Streamlines journey management with a mobile app for submitting Journey Management Checklists and Fatigue Management Plans, securely uploaded to SharePoint for monitoring and reporting.

Vehicle Safety Checklist:

Ensures vehicle safety with a mobile app guiding drivers through a safety check, with results forwarded to SharePoint for documentation.

Incident Management:

Allows employees to report incidents via a mobile app, with submissions sent to SharePoint and automatic action generation based on incident categories like cybersecurity, environment, and safety.
